

Parsifal Changes and Heals

INTRODUCTION

Dialogue Journey

Welcome to what is now my new next book, Parsifal Changes And Heals. This dialogue discussion on the journey between freinds and other readers, it is going to be challenging and exciting in the formation of another book of poetry for you to digest and take in, as I venture and endeavour to write it. Changes And Heals, like a book by Henry Cloud called, Changes That Heal, it will be a written inspiration and testimony to the faith of a loving God and a brilliant saviour in Jesus Christ. With a reason for living and for there being, us as a people with a purpose for living, me with a writing reason, with there being enough subject matter just in that, to create a new and inviting book for you to sink your teeth into. Rivoting stuff, right from the start, as we look at how people can change to be more perfect and reflect a Christlike image in the troubling world of sin, in the fight for the victory to win over those problems. It is always going to be about aches and pains of rebirth, fashioning our lives on something greater than ourselves, as we seek to please and adapt to a better place of living, called heaven. This new paradise state, is not only a blessing and a difference in belief, but a hope of certainty and security in a loving God named Jesus Christ. Changes and Heals will demonstrate this new way of being, thinking, seeing and relating, as in believing that what was is real, is yet unseeable and still is clearly visible through a heart and mind of loving faith. Don't be afraid to change, your heart, your mind, your belief system, from an old understanding of knowledge to a new vision of truth in the shaping of the rest of your life for a better purpose and reason for living. Let us let God do the work in our lives, let Him heal the hurts and take away the pains, as we change and adapt to the new vison of hope, in a faith of everlasting life, in the victory of the cross, through a God who loves us deeply. Come along for the ride on yet another book of poetry, Parsifal Changes and Heals. It will do him (Parsifal) good just like you and me to look at life in a lighter, brighter and more positive perspective, with a greater reflection on the good things to be worked for and earnt in the creation of being a new person. God Bless and Stay Tuned, It is all about to start happening. Darel.

FINAL WORD

Different Results

Things have worked out the way that they were meant to. They turned out the way that they should have did, trusting in Jesus Christ for all the differences to change and heal your life. Whether it is a medical reason that you are sick or just taken the wrong road in life, God is there to heal and change you into a better person by the road of life that you have decided to take. There are many intersections along the way where we have to choose to go one way or the other, not always are the right way and not all roads lead to Rome. Different results from what is expected is usually par for the course, the narrow way is never easy to find and the road often wide, leaving you high and dry inside. What matters is that we come back and connect with God again, stay true to him and follow accordingly as required, This also should be the desired road to take, one that leads you to the kingdom of heaven and of God, not the one that leads to destruction and to hell, where the Devil laughs at you all the time as he thinks he has won his victory. No God has the keys to eternal life, Jesus is the way the truth and the life. Stay true and focused on the desired kingdom, where your heart and head work together for good and not evil, where you find peace in God and worth for your life. God is the divine healer, and he has a plan to change you and mould you into a perfect person. Don't give up when you see or hear different results happening in your life, but stay true to the mighty creator who has won the victory over death. God bless you as you travel the road of life. I think we achieved the desired results from this book of poetry, I hope that you liked it, the different results are the beofre and

after you have read this book. Jesus is coming again, He is the almighty healer, changing you into a new and fresh being in His image, be Christ like minded. Darel.
