

The best place to put your money is safely in the bank,

When all the rivers running and flowing with God to thank;

When the waters overflowing and it is all going to burst the bank,

Remember the abundant life and rejoice and don't be a crank.

.

When all the good times are gone and past leave it up to God,

To renew you're lonely lives and help you not to be odd;

There's always money in the bank and we all can have our share,

But remember to be fair and patient and wait your turn and care.

.

The memory comes and goes and has gone and will come back,

And the money in the bank is there for those who want it bank;

Now you can bank on money every day and leave or keep or give,

But the best thing to do with money is to put it in the bank and live.

.

And you bank left or right and have it flying around the world,

And you can put it in your pocket and forget the bank is worth;

Or you can spend it nearly anywhere you like and always get more,

But remember if there's money in the bank you never will be poor.

.

And if you A in life and put all the money in the bank to be safe,

There will always be something in there and someone you can help save;

Now you can't take it with you when you die but money's there of course,

That when you're numbers up and account is empty there's one more resource.

.

Well I know there is money in the bank and have trusted it a lot,

And kept a little to myself for when the weathers cold or hot;

As the beauty of money in the bank is that it buys anything you want,

Just make sure you get the figure you need and keep everything you've got.

.
