

Parsifal Has A Go At It

INTRODUCTION

Life is just a bit really like that, you have to have a go at it or get left behind sitting in the corner. You can't afford to let life slip through your finger tips, you have to take advantage of every given particular moment and grasp it with both hands. Having a go at writing a poetry book, is something that seems to come easy to me, but it is never that easy in the set of situations circumstances until you have done enough reading to get your heart and mindset from your head, into the right mood and framework to put down words of rhyme and meaning into some sort of formulated document. Sometimes it is just about making sense out of the present or any given reality to create a picture of poetry in words for you the reader to decipher and gather ideas about. Parsifal Has A Go At It is indeed just another poetry book, but one which touches my heart as it is the work in the labour of love for writing poetry for me that has been a vision and inspiration to me and hopefully those around me, you the people who read and get involved in the journey of the work. All you have to do to write poetry is to get a visible idea in your mind and then put it down on a page from your head any way it seems to fit or come about. It does not take a genius to write poetry, but just someone who is willing to try and just have a go at it all, to formulate some kind of written work for others to read and digest. Words flow easily and freely through me, with diligent effort from reading, God gives the picture and ideas into the head and they just go down on the page automatically when you have tapped into God's full set of resources, His Bible and His wonderful sense of humour, that just smiles in the shadows of the work in the quiet reflection of His grace and love. With kindness in your heart you can passionately write words of inspiration based on the criteria of God's perfect character and personality. It just takes a bit of organising and thought reproduction to harness the enormous energy of a majestic and all mighty God into some kind of flowing format for the construction of poetry. I hope that you can find some love in this book as it comes into my head and is written down for you to read. It is about life, just having a go at it and making something to enjoy and reflect on out of it all, however it turns around and comes out. Please do stay tuned for this my new and latest new book, Parsifal Has A Go At It. God is love. Lets now see how we go with it. Darel.

CHAPTER 1 AT IT ALL

1 Trying to Write Poetry

Trying to write poetry,

Life in the universe;

Here on planet earth,

People coming together.

Trying to write poetry,

See it fits all together;

Fitting parts and pieces,

Kind and good and peace is.

Trying to write poetry,

For inspiration and meaning;

On your computer screening,

Clean clear sorted facts.

Trying to write poetry,

I hope it means something to you;

Doing the best that I can,

So it all works out for you.

Trying to write poetry,

Something I like to do;

Meaning from me to you,

Into a heavenly paradise.

Trying to write poetry,

Comes along easy though,

Its hard with the tough bits,

The pieces that just don't want to fit.

Signed,

It comes together.

2 One More Go

One more go at it all,

Give God a chance;

To come shining through,

The clouds and sky and air.

One more go at it all,

Rich and poor alike;

Poetry in liquid motion,

A people poetry potion.

One more go at it all,

Still fitting the pieces in;

When you would like to go out,

Instead stay home and write.

One more go at it all,

On this big spinning ball;

Life in all its complexities,

Perfect poetry perplexities.

One more go at it all,

Words flowing down the page;

Just at this age and stage,

God's mind is a good guage.

One more go at it all,

Ideas in an instant;

The minds reflex flexibilities.

Signed,

Patient Persistance.

3 Each One Takes Time

Each one takes time,

Writing poetry, who dares;

Plenty of love and care,

Perfect poetry from prayer.

Each one takes time,

Words going down in rhyme;

Fitting the pieces of the puzzle,

Coming together in the end.

Each one takes time,

Many dilligent hours;

Minutes making money,

Your in a hurry for the honey.

Each one takes time,

Life free on the edge;

Trees treated as a pledge,

The door stuck with a wedge.

Each one takes time,

Varied different meanings;

God gets the gleamings,

A past time of love.

Each one takes time,

Words flowing in an order;

From many different directions,

Self mirrored perfections.

Signed,

Fills and fits again.

4 Bit By Bit It Fits

Bit by bit it fits,

All coming together now;

Signes from the times,

Just how it all works out.

Bit by bit it fits,

Love and tender care;

Helping writing through prayer,

Words of life on air.

Bit by bit it fits,

Piece by piece it appears;

Filling your mind with peace,

Light from out of space.

Bit by bit it fits,

A cautious speciality;

Integrated easily,

The hard part you persist.

Bit by bit it fits,

Watch the time go bye;

An afternoons work relaxing,

Morning energies are taxing.

Bit by bit it fits,

Like circles in the circus;

Clouds go passing bye,

Life working before you die.

Signed,

Time or money.

5 Rhyming And Timing

Rhyming and timing,

Rhythm and beat as you go,

Words just must flow;

Good to know and grow.

Rhyming and timing,

Reflecting God's truth;

Bowing down accordingly,

Perfecting blameless shame.

Rhyming and timing,

Cost, cared and paid,

The price through prayer.

Rhyming and timing,

Jesus knows your name;

Blessed mercies are mighty,

Grace and love your fame.

Rhyming and timing,

Poetry along the lines;

Words flowing and rhyming,

As a tree grows in life.

Rhyming and timing,

Loving, longing, looking;

Like sand through an hour glass,

Your poetry mark must pass.

Signed,

Best endeavour.

6 Every Little Bit

Every little bit counts,

As much as you want;

Pay with your heart,

Dearly as can be expected.

Every little bit counts,

Blind to the effects of others;

What matters is what you have got,

Getting for self, giving to God.

Every little bit counts,

It all adds up and amounts;

Careful with kind consideration for others,

Putting away a little bit at a time.

Every little bit counts,

Look after each and all;

See people are clearly right,

God blesses and God delights.

Every little bit counts,

Kingdom of heaven is great;

God comes in the clouds of heaven,

The kingdom of God must relate.

Every little bit counts,

Beauty personified in trust,

Careful of the dust and lust,

Everything you do and must.

Signed,

God matters.

7 The Whole Thing

The whole thing really is,

Right from the very start;

Triumphing grace from sin,

Mercies pleasures set to win.

The whole thing really is,

Love and goodness equalling;

Kindness found in the hearts of others,

Sharing and caring sisters and brothers.

The whole thing really is,

The big earth ball spinning around;

The world upside down and inside out,

Completing competition from doubt.

The whole thing really is,

Faith at the heart of the matter;

Doctors, organs and ocean currents,

It seems to accumulate amounts.

The whole thing really is,

Graveyards and cemetaries full;

Headstones to remember bodies by,

Life at the end of the tunnel.

The whole thing really is,

The sun shining bright at night;

Shadow and shade of the earth,

Turning dawn into day.

The whole thing really is,

Shedding a bit of light on the subject;

Perfecting each habitable suburb,

Working for results superb.

Signed,

It all fits in.

Numerically all worked out;

Five on each hand, ten total,

Like toes I suppose as well.

Fingers are digits,

Not all thumbs today;

For building and writing,

For fun and play.

Fingers are digits,

Figure out what to do;

Logic for the well not sick,

Whether your going to heaven or hell.

Fingers are digits,

For eating and cleaning;

Love goes hand in hand,

A pefect number to tell.

Two hands.

FINAL WORD

Greed and Grit

Why do we need to be sure of everything we own? The greed of life and the getting back to the nitty gritty, it is a match making peace of mind in heaven. It is hard to distinguish between the continental flow of poetry and the use of the English language for continuity and contentment. Easily providing and seeing what is in the heart to depict the minds state of being. It all comes back to what we believe and how we conceive to except what we see in other people, a gift of love and not hate. Greed corrupts the whole community in a world where nobody really cares about anything but themselves. If we think hard and grit our teeth in disbelief and not worry about what we think people or the world owes us, then we have found a more contented way of living and lifestyle. Parsifal Has A Go At It has been about that love and labour of working thoughts and transpiring them into written words of care and attention in the love of writing lines of things, to just have a go at it all. Working out what it is all about anyway, life is that same picture portrayed into real aspects of dialogue and discussion. I hope that you have found a bit of joy in what you have read so far and that you to can put yourself in the puzzle and create the ending picture of a new and created lifestyle of interesting thought. If we greed all the time, we are going to go on and regret it in the end. The gritting of denial is the strict differentiation of life and money, time comes into play and we find a place of relaxation and enjoyment in the peace of heaven and eternal paradise. Thankyou God for giving me and the rest of you all out there another book to read and write. I hope that there has been a few smiles put on the faces out there of interested believers who have the faith to go the distance and the extra mile if need to be. God bless you all once again. Darel.
