

I can't do it, that's anything; I don't think I can,

Laziness is a state of mind and waiting without a plan;

A condition like schizophrenia that pills understand,

To a passive temperament and put you in dreamland.

.

It's kind of heavenly doing nothing but unproductive,

Not going to work like hell to be constructive;

Doctors know a reason and doctors know the cause,

It's a fattening in laziness while taking time to pause.

.

It's like sitting around as the snow falls each winter,

Waiting for something to happen so to be a winner.

I think I am trying to profess a bit, due to medication,

Really best answered by reading books on meditation;

.

It's hard to beat and get on top of it all just rightly,

The earths so heavy and you sit around it a bit lightly;

Alcohol or smoking can be an easy evil relaxation,

Instead of food and water, working, paying taxation.

.

Is money really the answer or working just to learn?

The problem of doing nothing will never feed or earn!

To much television is not a requirement to do enough,

Life won't last forever but make you rough and tough.

.

Don't waste away the day but use your time wisely,

Where things should be done being used purposefully;

To die a death to laziness is it really highly unlikely?

You need to be more active and live more energetically.

.

**Signed,**

**Life be in it.**
