There's many different places, which to find animals,

Dogs, cats and birds around the home domestically;

Farms have pigs, cattle or sheep and they're for food,

As well as horse studs for riding when in the mood.

.

Africa has wild animals like elephants, tigers or lions,

Zebras, giraffes and hippos with rhinos in these lines;

Herds of gazelle and antelope for killers, who do prey,

Monkeys or apes are not people and cannot pray.

.

Animals can be people who do not seem to care,

Who go around untidily and unclean just to dare;

So watch out for these and teach them what to do,

To live like humans and learn how it all comes true.

.

It's an insult of intelligence for animals to be human,

Not praying for their food they won't reconsume it;

Comparing ourselves to others, what's in the mirror,

Do we need a doctor or vet to work another miracle.

.

It is better if humans go to church and pray to God,

Where the love is in the air and beats up all the odd;

Animals can still be nice to have and keep as pets,

To move around the house like seeking looking bets.

.

Animals all need food and have to eat the right stuff,

So train them all instinctively so they're not so rough;

Marsupials and mammals are native living in this land,

As in the ink of my pen is rich coming from my hand.

.

Signed,

It's healthy to be human.
