

INTRODUCTION

Its A Bit Special

The acute pendasitus of writing, is getting over the hurts and pains of suffering in writers cramp and diplomatic dilligence to overcome and write a melancholie of award winning criteria. Its a bit special to get over the dulldrums of everyday activity and rise above your fears and doubts to get right with thinking and develope an organised mind of continual improvement. Parsifal Tries Fine Tuning is the overcoming and adjusting, to rise above these pitfalls of depression and also to come into the elite writing level of the depictures situation, of a heavenly high state of mind and a full range of beautifully brilliant thoughts, fine tuned and adjusted to, in expressive writing. I will be aiming and seeking the path of status in writing this time, by trying to rise above the occasion and coming into a level of highly contributive and reflective thoughts, that will pattern out and rise above the ordinary. It is a long hard task and slog to get into it and to go through it, but nevertheless I am up for the job once again. With the encorporation of an anylitical creative state of mind, critique the arts of evolution into reigning over the boredom and dullness of normal life. As we take on this reflective task together of trying to fine tune the graceful and gracious arts of fine writing. Then to come into that pattern level of foregoing frustration, by the overcoming of detailed and expressive work in the hard core structure of beautiful reflective thinking. As to shine in the glory of God's son coming in the bright eternal light of the life of man. We will try to do it by uncovering the means and powers of quality work in the exercise of fine tuning. You simply can't do everything on your own and without the help and support of the readers this would come to nothing. Come along once again for the ride of your life while sitting in your lougherom theatre of home comforts and well being. Thanks for turning up again for this one, lets get going and try to take on the world of fine arts by tuning into the writiers heart and passion of a well written writers mind. The hard part is for me to now do it and rise above the pitfalls of average life and succeed in the endeavours to soar on eagles wings where by one can overcome the storms of life and cloudy living, to a point where the sky meets the atmosphere of air and stardust. Welcome to Parsifal Tries Fine Tuning, its just a little bit special. Darel.

FINAL WORD

I Tried Hard

I tried hard to write a poetry book for you, that was set about and designed to entertain. I hope I gave it my best shot, after all that is which is always best left for you to decide the outcome and the judgement of the finished work. I have captured some meanings of the moment and skipped and jumped back and forth to try and cover all turf and ideas without leaving anything left out or untouched. So as to not miss the boat completely on all the aspects of what I was trying to say. Encompassing and encompassing each and every different type of aspect to engage in altercations of deception and receptiveness of thought. By being transparent and observing the laws of nature, I have tried to tap into the finer resources of life and to discover the events of all types of happenings and behaviours. The realness of the thoughts only come about by congruent and anticipation of reasonable righteousness in reflecting the true cover story of the general book idea. I hope that you might have seen something of yourselves in the reflecting of these ideas as to my individual personalities adaptations and your own interpretations in the reflection of the work outcome and eventuation. I think that we have retained the possible improvement of writing, but still struggled with the real nature of the criteria. In all honesty I think I could have done a better job with more depth in some of the poems, but sometimes a light hearted approach can be better by being different than trying to tackle too much meat and not meeting the expected standards of the original conception. While some of the poems, a fair few to be exact were only short, sharp and hopefully to the point, at least we have got through it and done the job with a finish of a somewhat realistic endeavour. I do really hope that you have enjoyed Parsifal Tries Fine Tuning, it was always going to be a difficult one of rising above and going to another level beyond my normal standards. Great stuff I think, I hope you all enjoyed it, lets try again now in another book. I tried hard to make it a little bit special, I hope at least that was seen within the sixty poems written. Sometimes though I think that you just have to assume that grace wins everytime. Thanks for reading it. Darel.
