

You have to learn to read in order to really write,

So when you write it down on paper it turns out really right;

If you lead yourself to do it you really have to be lead,

For reading of the paper is writing from your head.

.

If you think you cannot do it, have some consideration of mine,

For God will lead the odd for people to rewrite every crime;

And when it's down on paper you have to read and write again,

For the words come easily from the heart flowing down your pen.

.

And the enjoyment and relaxation are a beautiful peace of mind,

As you twist and turn the words logically leading them so kind;

So to read and write the situation you need a special idea of right,

That the way to make you life work out is in the way you write.

.

So what you read is meaningful and pays the average bill,

And the quantity of words might be enough to fulfil a mill;

If you're not or are unable then the ability shines through,

For the help of one who's able will lead you to what's true.

.

With the force of constant creation comes the ability to right,

That when the day is dead and done the black goes into night;

For the reason that were living is a better way of life,

And that is kind of heavy and leads heaven and hell to strife.

.

So pick up a pen when you've learnt enough and have a go at it,

For the survival of the fittest is the arrival of the fit;

And when you put your pen down in order to be read,

Remember that the reward is blood red and not being dead.

.
