

We all have a contribution to make to the attributes of life,

Like an allocation of atrocities we constantly try to stop strife;

We write it all however the attributes talk to place their part,

That the decency in living is positive characteristics being smart.

.

The attributes of heaven are a constant form of addition,

To the personality we develop and adversity of all addiction;

The complex compilation of consulting the best of God,

Is the attributes of the nation who individually fail as odd.

.

Now concerning the attributes of God, further and in more detail,

We should consider all the goodness and products we can retail;

For the prize of natural selection is a fascination of what's kind,

That the determination of creation, is omnipotent mighty mind.

.

If the attributes of the person are respected and seen as well,

Then the health and wealth of a person refrains from going to hell;

For value of the people is a net worth and attribute of all,

From the big picture of the earth, down to us who are so small.

.

Please gather understanding so we can all decide what's best,

Not to tempt and tease our father or put our God to the test;

It's a pleasure to progress with attributes of beauty and of brains,

For there is luck in every mind whose brilliance allows the rains.

.

Like the kingdom and dominion of wisdom and the like light,

The reigns of our majesty will lead the lord of eternal life;

And these attributes are for keeping whenever the world is one,

That we win the most experience from what we have and won.

.
