

Not everyone has fish and chips or a pie with sauce,

If you're a child you need food for growth and nourishment;

The food chain provides a source of food for us all,

So don't throw good tomatoes at a person or at a wall.

.

The source of the energy is a modern day account,

Where power mounts up and people pay money amounts;

For we all need the resources of how to buy things to live,

Like lights and appliances and cars and roofs and houses.

.

Electricity is a source of power to allow for all of the people,

Since lighting broke an empire and all the churches steeple;

Now solar cells and wind power are the greener future now,

When horses are raced for raising money or it's for milk from a cow.

.

Sources are a means of how we apply ourselves and ensure to pay,

When all the earth turns by the right light of the day;

And the sun burns with fury, so there's power there to harness,

When the night is cool or the ice poles seem so harmless.

.

So sources are a way we can make nearly all things pay,

Because they have origin and virtue and other things to say;

Now sources are used and borrowed and remembered each way,

So that you can put your feet up at the end of each day.

.

Well mines give minerals and metals tend to make money,

And the source of the metals from the earth refined when sunny;

So now sources are used and made for the purpose of honey,

Be remember where they come from or the sources are funny.

.

Signed,

Being People.
