

There is a number of appliances you need to consider,

The fridge and the stove, the washing machine or computer;

It's a technical world nowadays with innovative information,

With the advancement and understanding of modern intelligence.

.

Appliances come to mind in electronics for positive applications,

Intellectual ingenuity of appropriateness for applicable appliances.

Applied sciences and electrical digital linkups and connections,

That highly sophisticatedly work to make life easier for selections.

.

Appliances of energy and effort and the memory of the brain,

It's easily harder to be comfortable or uncomfortable sane;

When beautiful things make everything easier for gain,

But with appliances it's an aptitude of constant restrain.

.

Don't refrain from the vacuum cleaner as space needs power,

And water ruins electric motors that run on money and air;

The toaster and kettle are a small matter to my mind,

Both a luxury and a necessity and heart to keep kind.

.

Find the right things you need and apply them to your life,

As appliances are fine additions for a minor form of strife;

But it's nice to be smart and clever and have what you need,

Like a list of appliances as electrical equipment being able to read.

.

Now I'm leading with this verse and the appliance is state of art,

So you need the latest model and best brand because there heart;

If you're smart you'll follow orders and take direction for the way,

To get you to the top of the better appliance list giving out each day.

.

Signed,

Electric Luxury.
