

The minerals are mined for a very good reason,

That money can come and go in and out in any bad season;

The mine and the mineral are often different things,

To my mind the minerals are geological chemicals in thinks.

.

Like bath salts from a spring of a sea with artisan water,

The mineral salts are soothing and healing to the skin pores;

Like sodium and calcium or magnesium and phosphorous,

The minerals that are mined are unstable and prosperous.

.

There are reactive types of metals being minerals to compound,

To alloy them together you have to alkaline the ground;

For the merging of the active with the stable to facilitate,

The usage of the merger for the table united facilities.

.

So people wanted money but chemicals were highly intelligent,

To the human being the minerals are useful and beneficial;

But we understand the happiness is the purpose for our health,

And not the mineralogy which requires clever money wealth.

.

So the commonwealth is full of hard working loving people,

Whose chemicals and their brains are not alcoholic steep hills;

And metals in the car and the minerals in the people,

Are a happy combination for the money in congregation steeples.

.

We know that if you are good enough, you can trace the elements,

And the minerals are chemicals in the weathers different elements;

Like the wind and rain and lava or snow and ice,

These contain minerals so listen to good advice.

.

**Signed,**

**I do understand a bit.**
