

I'd like to start by saying this is the most important ingredient for living,

Secondly intelligence is not always having and knowing but giving;

Getting and keeping is the mentality of intelligence to some people,

But intelligence really is sharing because it takes two to talk in a period.

.

Intelligence in raw format is the highest form of thinking and thought,

It is the ability to differentiate truth and facts from lies and not distort;

You see we must see difference between the right and wrong of actions,

Because the meaning is in black and white while colours are attractions.

.

You don't inherit intelligence or learn it quickly but slowly develop,

For intelligence is a wisdom taught by those who read and studies envelop;

Naturally we all want it and it takes time to understand,

But gradually, gracefully we know how tell what it is now to land so grand.

.

We watch television and have computers and mobile phone at hand,

But it is the technology behind them in the mind the brain commands;

As we aim for the stars beyond what is still on earth,

For if the intelligence was in the heavens there would be all worth.

.

But how nice it is to know that the love and peace of God,

Is a real joy to bestow on the hearts and lives who intelligence is odd;

And when intelligence is wisdom you really know the paradise,

For what the beautiful and the brilliance are, is a genius paradox.

.

Now there's intelligence for things and money to buy from the shop,

For the love of family and the faith in bringing them up;

So is intelligence is a piece of property to have and say I own,

Or is intelligence is a choice and decision on what you say you owe.
