

INTRODUCTION

FRUITFULLNESS

Fruitfullness is a positive equation for being productive. One must use their time wisely in order to bare fruit. On the other hand fruitfullness is about quality of life and all the benefits about producing fruit. Fruitfullness is spiritual food for the soul and the outcome is the income of finances. Obviously people will say that money is what it is all about, but it is the accountability of the regular information process of knowledge to keep reproducing in quanlity for the future which in turn will lead to the eternal forever. Then the practical side of fruitfullness is the sweet taste of success and the rich quality of life in the repeating cycle of word management. Effort and energy, as strenuous as it is, is a real time user and can be a real strengh increaser, that can turn around to become fruitfullness if we don't waste resources and use wise means and ways for understanding compound interest in problems so that the equation balances nicely and richly. For if we are all poor we forget what labour of love there is in planting fruit trees and picking and reaping the harvesting to eat. For as sweet as the fruit tastes, it is as rich as the food can get, for rationally speaking the proof of the pudding is in the eating. So when you have your next piece of Christmas cake with or without custard and cream, remember the pudding was best because it had fruit in it and you had to save room for the cake. I know it is a play on words and a lullabye is well gone in the past lifetime of dreamland but we must learn to utilize and use all resources of the past which we can draw into and bring out the repetitive repetoire of memories and cash in on the modernization of modern writing and talking to become unconditionally well understood in and for fruitfullness. In every matter, way and form of speaking it is about harbouring the enjoyment of long term constituences through endurance for proclamation of the best circulation with accumulation and its productive fruitfullness. As we all know, with a collection, it is the distribution in generating and creating profitability and therefore, it is answered by, the pleasure of the treasure. It is in this producing of fruitfullness we create the enjoyment for the fullfillment in life and it is this lingering of thought that gives us the long term and lasting peace of fruitfullness and the sweet taste of life itself for eternal purposes. Now as we enter into the Seventh book of Poetry called Parsifals Seventh Heaven we establish a track record of and for fruitfullness and I hope that you can see some of this fruitfullness in the work of the this the Seventh Book of Poetry for your ultimate pleasure and enjoyment, so that you to can produce this fruitfullness of what a productive life is all about. Continue on and be blessed. Darel.

PARSIFAL'S SEVENTH HEAVENÂ

CHAPTER AND POEM LIST
