

Don't dismay it's alright I pay,

Concentration I've found is usually the best way;

To get what you want and never to stray,

By following your God and focusing on the day.

.

Decisions are made by faith with grace,

In any matter or any time and space;

Now for the moment we'll need one idea,

Of what can work out without any fear.

.

Concentration is like trying to live in the past,

With this quest on earth that goes very fast;

So concentration is the thing which helps us to think,

Try and make it important for it should start to link.

.

To me it seems tragic to harp on a point,

But this should be magic like a bone in a joint;

Concentration is an effort that depends on us all,

With the world going round like a big spinning ball.

.

Well is this a problem to harp on some more,

Or will we all end up being quite poor;

Concentration is for well wishers, who find life attractive,

Like light through a prism proves to be refractive.

.

I'll now stop and concentrate on what seems best,

That's if I'm clever or not as some might have guessed;

So I'll never give up till I write the next line,

But concentrate on any word that fits with the design.

.

**Signed,**

**Parsifal.**
