

The world goes around in its wonderful way,

As the earth turns about in its course all of the day;

With plenty of places to visit and people to meet,

While you see in your heart where to travel and beat.

.

The earth, such a big place with so many countries to visit!

With things in the cities waiting for you to do business;

While there is food from each culture just wanting to be had,

As you spend and invest on what is good and not bad.

.

Fly over here or catch a bus and train there,

With scenery so beautiful you will just love to go where;

And why sit and wonder about a place you would rather be,

When all you have to do is pack up and go there like me.

.

Keep an eye out for a woman with whom you will talk,

To spend time together with and find time for a walk;

You might hold hands as you stroll along a river bank,

And stop for a cup of coffee and give her a kiss to thank.

.

With love in your heart and peace of mind in your head,

Knowing that God has in store to want you both led;

It might be an idea to buy roses or chocolate instead,

As the question lies waiting for an answer to be said.

.

Now where you've been travelling and still have to go,

Is all of those places which are still left to know;

You might consider settling and getting money to marry,

Then keep travelling around with some more things to carry.

.

Signed,

To be a bit swayed.
